## Message

SATSA is the Iranian Industrial Equipment Manufacturers association. This catalog presents the capabilities of SATSA members and their references as well as their contacts and attributes.

In this catalog, products and services provided by all SATSA members will be explored. For further information regarding each member, you may refer to their website or contact them directly.

The range of products and services supplied by SATSA members includes a variety of industrial demands including Oil and Gas, Petrochemical, Power, Water, Steel, Cement and etc.

Industrial equipment manufacturing in Iran has developed significantly within recent decades, so much so that almost all currently manufactured products by SATSA members have suitable quality in accordance to API and/or European/ Iranian Standards.

SATSA members have acquired the infrastructure and capacity to support not only the Iranian markets for the specified fields, but also to export their qualitative products to overseas markets.

For best use of this catalog, users can refer to the table of contents to search for company names or use the glossary to find Iranian suppliers for each equipment and industry they may require.

SATSA's catalog is scheduled to publish annually and can be found at [www.SATSA.ir](http://www.SATSA.ir) or through SATSA headquarters.

### Vision:

Developing of opportunities for localization & technological Improves along with International & local markets & Relation for Iranian Industrial equipment Munufacturer

### About SATSA:

SATSA  
Iranian Industrial Equipment Manufacturers Association

Iranian industrial Equipment Manufacturers Association was found in Aug. 1989 based on requirement of developing and improving industrial and projects. SATSA Association is looking forward to reach the following goals.

- Developing Export (members products)
- Training
- Research
- Quality Improvement
- Technology Transfer
- Developing Foreign Relationship (Between members & international companies)

### Field of Members Activities

#### Fixed Equipment

- Pressure Vessels & Tanks
- Heat Exchangers
- Steel Structures
- Offshore Facilities & Platforms
- Piping
- Filter & Seperation Equipments
- ...

#### Rotary Equipment

- Gas Turbines & Turbo Compressors
- Utility & Process Pumps (API/ Non-API)
- Drilling Equipment & Accessories

#### Process Equipment

- Packages (Chemical Injection, Wate Desalination, Polishing & ...)
- Reformers
- Towers & Internals
- Heat Exchangers

#### Port Handling & Rail Way

- Rail Way Equipment
- Cranes

#### Special Equipment

- Glass Lined Equipment
- Fluoropolymer Accessories
- FRP & GRP Piping & Tanks
- Coated Pipe & Lining
- ...

Oil Gas & Petrochemical

Chemical, Food & Medicine

Mining

Energy

Water & Wastewater

## Aban Innovative Technologies Group Co.

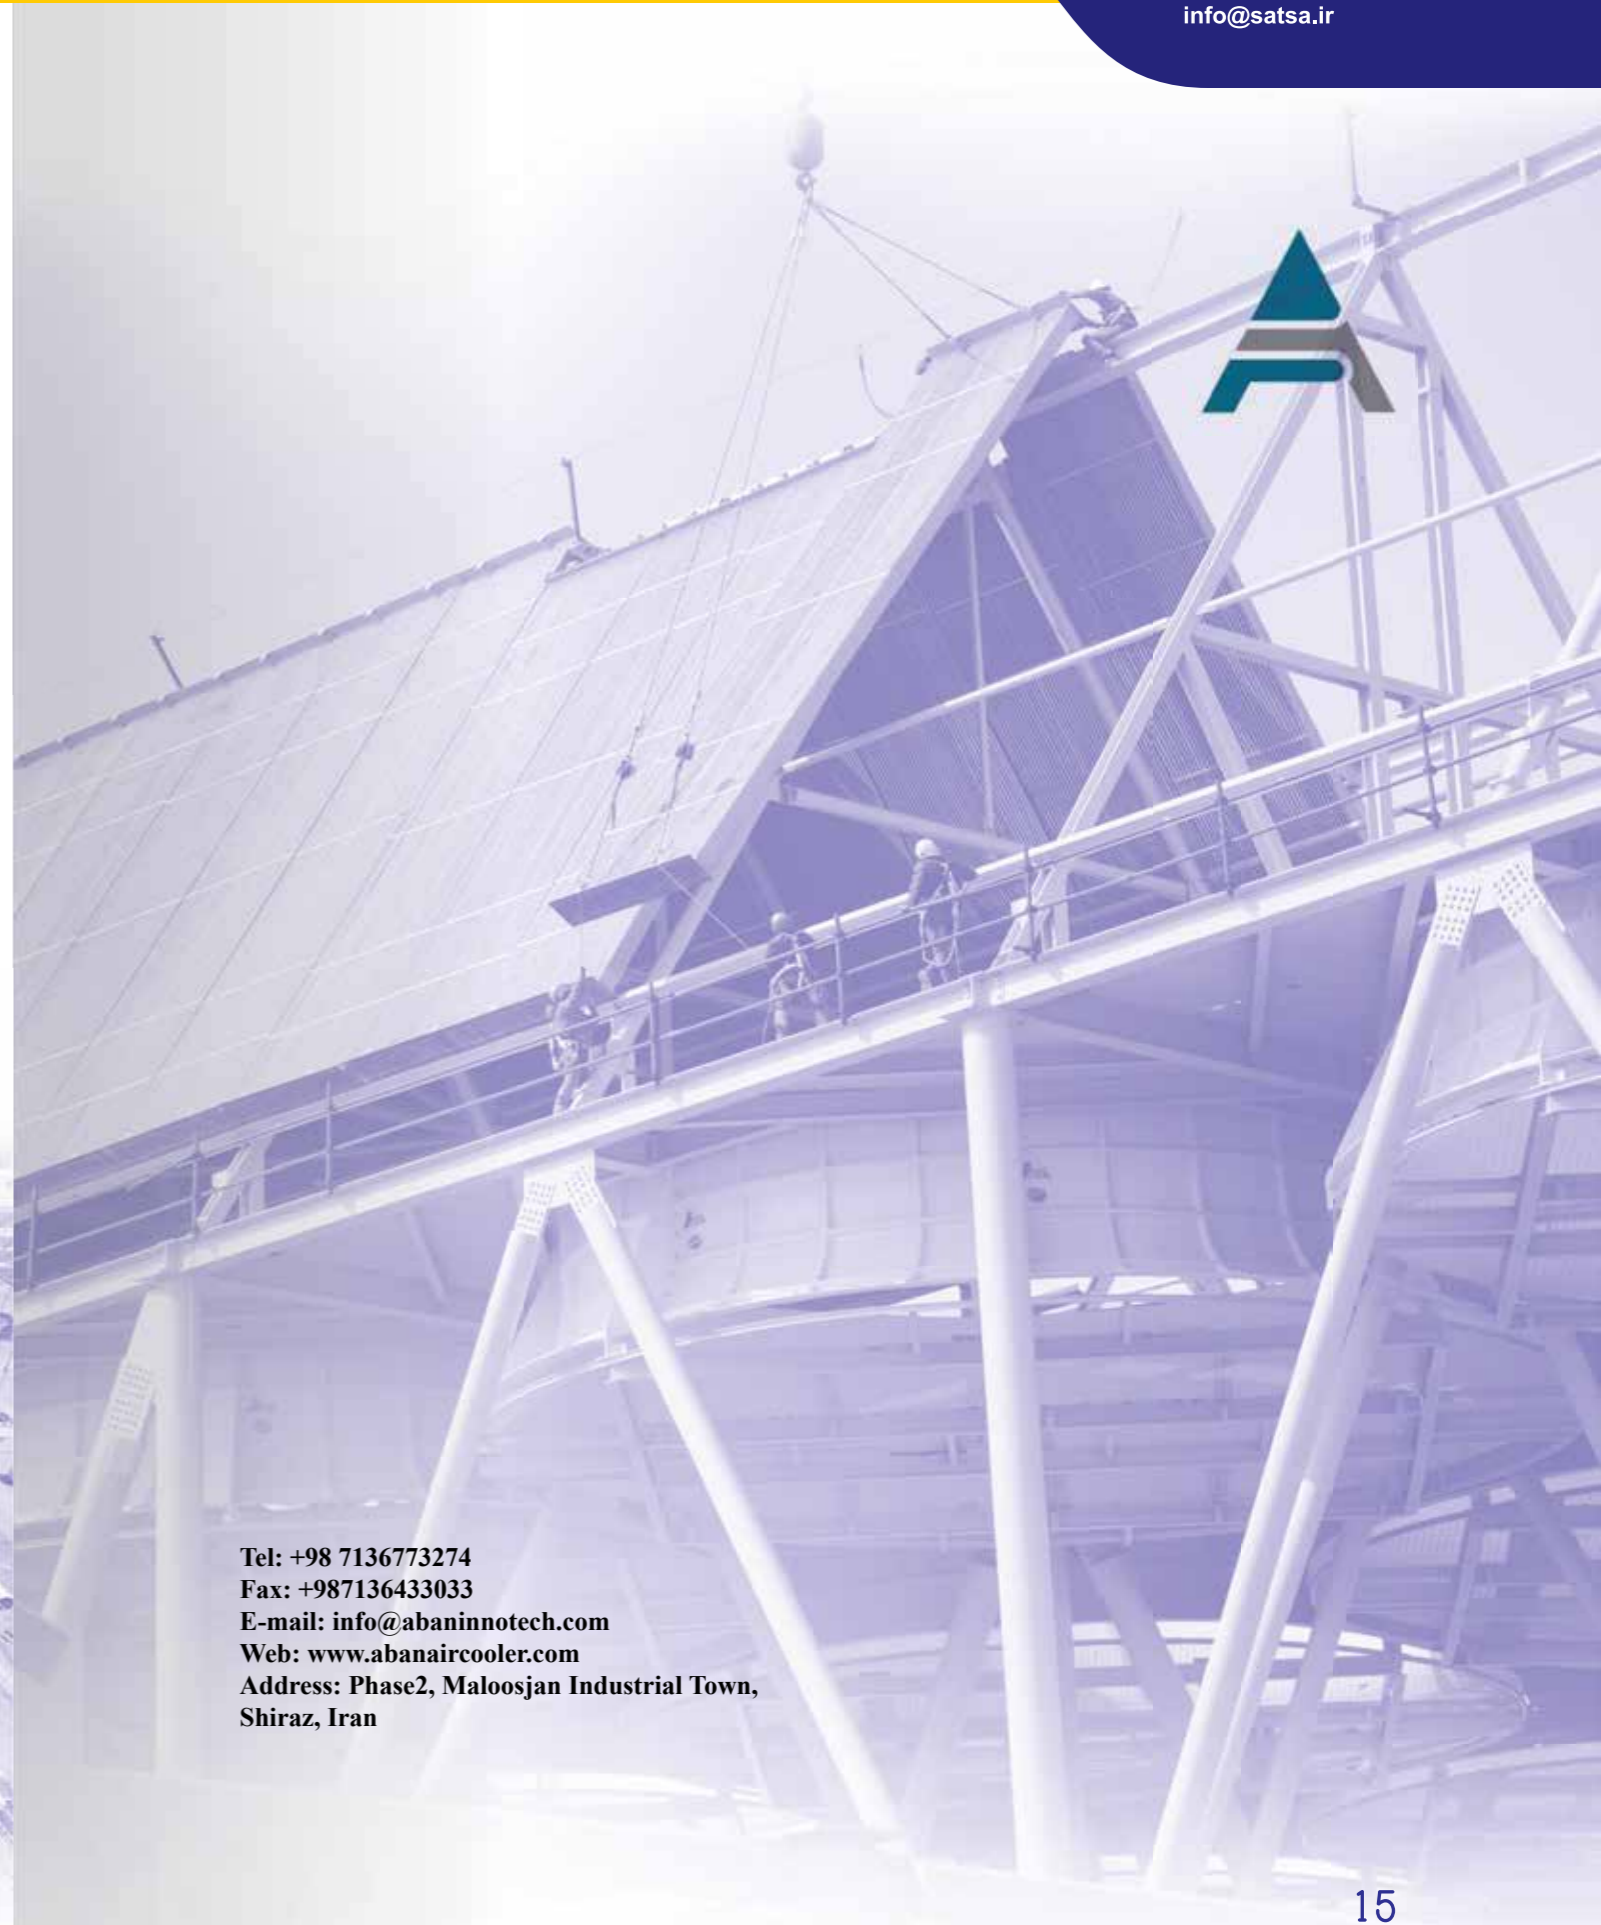

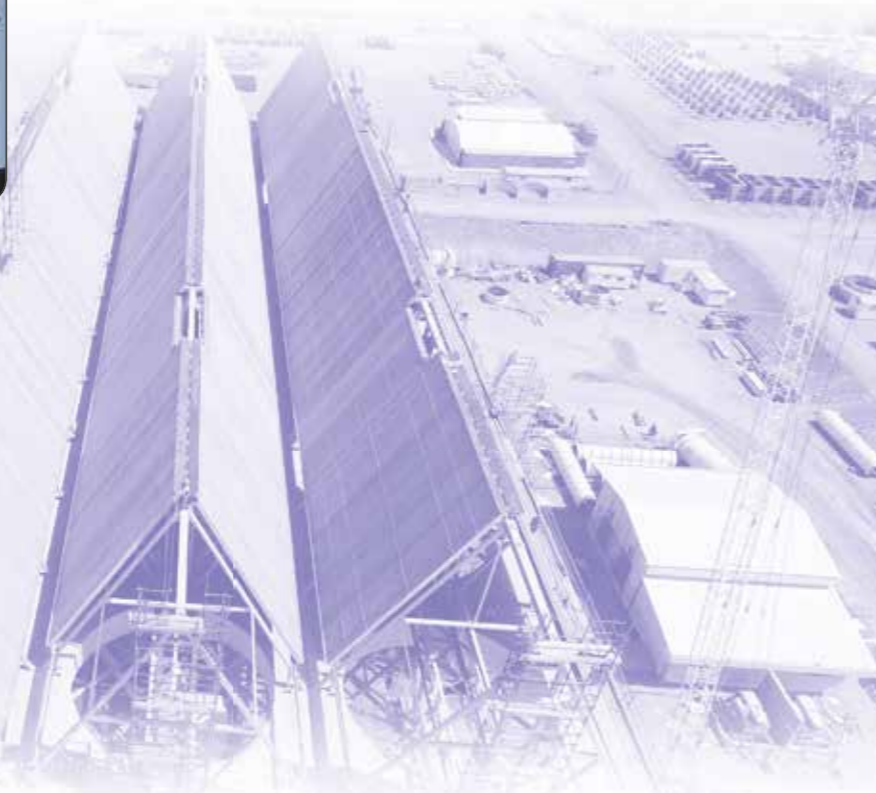

Founded date: 2013 / 10 / 13  
Office & workshop area: 5,724 m<sup>2</sup>  
Number of Staff: 141

### Products / Services:

Air Cooled Condenser (ACC): It's a system used for cooling of steam in the Thermal Power, Oil, Gas and Petrochemical Plants. In this system, steam enters in vacuum/half vacuum condition, and is distilled and exits as saturated water. Vacuum pressure is a critical parameter to consider during the design procedure.

## Aria Rockwool Company

Founded date: 2007 / 07 / 11  
Office & workshop area: 20,200 m2  
Number of Staff: 100

### Products / Services:

Rockwool insulation classified as hot insulation with efficient thermal performance in wide temperature range of 30~850°C.

Rock Wool Blanket Insulation is used for equipment and curve surface and high temperature applications.

Rock wool Pipe insulation is suitable for insulating pipelines in hot temperature up to 650°C.

Rockwool panel insulation is used as acoustic and thermal insulation specially in buildings Up to 500°C

PIR cold insulation is used in cryogenic systems for Pipelines and equipment (-196 ~ 140 C.)

### Products / Services:

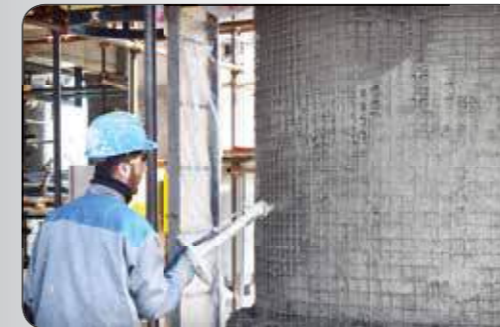

PIR preformed insulation (panel and pipe section) is shaped by CNC in different size and thickness.

Injection foam insulation (Poly+Iso) is used for insulating complex and inaccessible surfaces.

PIR Spry insulation is used for building and industrial structures and equipment for low temperatures.

Aria FP100 is cement base material which protect concrete and steel structures against fire 1-4 hr.

Mastic FS80 (adhesive sealant) is used to stick the insulation components to each other for sealing.

First design, manufacturing, installation of jacket insulation and high quality of textile expansion joints.

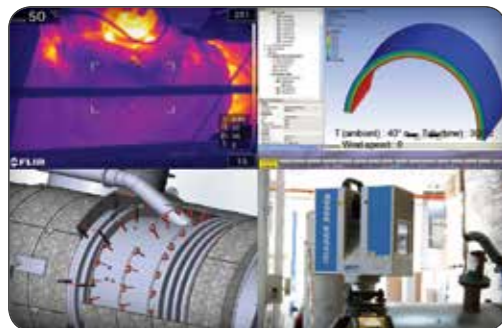

Founded date: 2004 / 03 / 16  
Office & workshop area: 2,500 m2  
Number of Staff: 68

### Products / Services:

Versatile insulation material for all temperature range from -168 °C to +1260 °C  
Good chemical resistance at high temperature.

- Design and engineering
- CAD-CAM modeling
- Thermal analysis
- CNC cutting
- Optimized manufacturing conditions.

- Insulation of gas turbines
- Thermal, acoustical jacket

### Products / Services:

Cladding insulation for gas, steam turbines ancillary systems.

-Re-design and modernized old insulation system, to high quality insulation jackets. -Increasing the efficiency, decreasing the heat loss, easy handling.

Passive fire protection jackets to protect assets, ESDV valves, in challenging environment. Certified in accordance to UL1709.

Thermal and acoustical insulation for valves, flanges and equipment.

Expansion joints, klevers expansion joints, spring joints are manufactured based on U-type, belt type method to offer the best result.

Corrosion repair and protection system  
Solution to corrosion chemical attack, abrasion and wear problems by design and applying of repair composite materials and protection coating.

Description: Impact crushers - jaw crushers - screw washing machine - screens - vertical shaft impact crushers (rock on rock) - feeders - conveyor belts - scrubber - cone crushers - bachin plants - asphalt plants.

Products / Services:

Jaw crushers  
All type of jaw crushers (90x30 - 75x45 - 80x55 - 90x40 - 100x80 - 100x63 - 110x90)

Vertical shaft impact crushers  
(rock on rock)  
The last technology of Europe for sand making

Two shafts Screens  
In variety types and dimensions

Asphalt plant  
All type of asphalt plant  
(80 t/h - 100 t/h - 120 t/h - 160 t/h)

Impact crushers  
hazemag types in different size and the same standard as europe

Impact crushers  
Bohringer types in different size and the same standard as europe

Products / Services:

Heavy duty vibrating Feeders  
Heavy duty feeder type In different size

Incline Screens & bohringer type

### Products / Services:

NASIM Fan Coil Floor and Ceiling Mounted  
300-800 CFM

Unit Heater  
1120 - 5200 kcal/hr

Water Cooled Condenser with DX evaporator  
128-2007 kW ~ 36-570 TR

Fin and Tube condenser with DX evaporator  
97-1918 kW ~ 28-546 TR (up to 52 C ambient temperatures)

Microchannel Condenser with DX evaporator  
100-1727 kW ~ 28-490 TR (up to 52 C ambient temperatures)
